

Season _____

Property _____

Wool Book

Important

Weighing your bales

Maximum gross weight

The maximum bale weight for wool of all descriptions is 204 kg (450lbs). Bales received into store over the maximum weight must be adjusted by the Broker. Each bale handled incurs a charge which will be debited to the Grower. Shed weights should not exceed 190 kg (419 lbs).

Minimum gross weight

The minimum bale weight for wool of all descriptions is 120 kg (265 lbs), with the exception of some speciality wool types, which may have a minimum gross weight of 90 kg (198 lbs).

Do not exceed the recommended bale weights

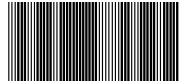

Branding your bales

Doubt frequently arises in the wool shed as to the correct method of branding bales.

Bales with labels

Firstly, ensure the bale is folded with the label flap on top. It is an industry requirement for all details to be completed on the label using a stamp or a black permanent marking pen and the woolclasser's stamp.

- 1 Owner's Brand
- 2 Description of Wool
- 3 Bale Number
- 4 Registered Classer's Number

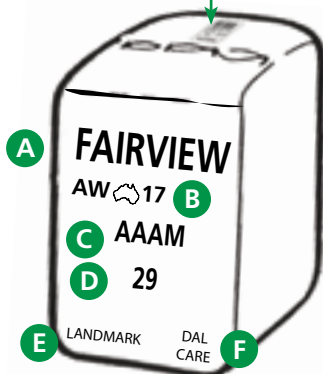

Brand	
1 FAIRVIEW	
Wool Description	Bale Number
2 AAAM	3 29
Classer	4 AW 17
00 159 4033	
	
001133 234 444 545 55 566054	

The face of the bale must also be branded

- A Owner's Brand
- B Registered Classer's Number
- C Description of Wool
- D Bale Number
- E Destination Stencil
- F Dalcare Stencil (where applicable)

Bales without labels

Brand both the head and face of the bale. Start each season's clip at No. 1 and number consecutively right through to the last bale.

Avoid duplicate numbers on Bales
